Our Prices Are A Steel

Structural Steelwork

Our Structural Steel carries the CE mark . We are Committed to high standards and are BBA certified for Factory Production Control.

ABOUT US

Based just off the A371 between Wells and Cheddar MAT Welding is a company that prides itself in providing consistently high quality metal work to the construction industry and to private customers.

We have a comprehensive service to offer from fabrication of structural beams and columns to designing smaller secondary steel products. We can also offer a fitting service whether it is a small hand rail or a large farm building.

The growth of our business has come from satisfied customers, who then make us the first choice for their needs time and time again.
